The cost of generation of power varies from country to country on account of various factors such as location technology, lended cost of fuel and cost of capital etc.

Investment on Hydro-power projects

1876. SHRI RAVULA CHANDRA SEKAR REDDY: Will the Minister of POWER be pleased to state:

(a) whether Government have set any target for electrification of every village in the country,

(b)ifso, the details thereof; and

(c) the capita! investment made on for hydro power projects under construction and allocated in each State during the current year?

THE MINISTER OF POWER (SHRI SUSHIL KUMAR SHINDE): (a) and (b) Yes Sir.

The Government have set a target to make electricity available in every village in the country by 2009 under Rajiv Gandhi Grameen Vidyutikaran Yojana (RGGVY), scheme for the attainment of the goal set for providing access to electricity to all households over a period of four years.

Ninty per cent (90%) capital subsidy would be provided for creation of—

(i) Rural Electricity Distribution Backbone (REDB)

Provision of 33/11 KV (or 66/11 KV) sub stations of adequate capacity and lines in blocks where there do not exist.

(ii) Creation of Village Eletrification infrastructure (VEI)

Electrification of un-electrified villages,

Electrification of un-electrified habitations.

Provision of distribution transformers of appropriate capacity in electrified villages/habitation(s).

(iii) Decentralised Distributed Generation (DDG) and Supply

Decentralised generation-cum-distribution from conventional sources for villages where grid connectivity is either not feasible or not cost effective provided it is not covered under the programme of Ministry of Non-conventional Energy Sources for providing electricity from non-conventional energy sources under their remote village electrification programme of 25000 villages.

(iv) REDB, VEI and DDG would also cater to the requirement of agriculture and other activities including irrigation pumpsets, small and medium industries, khadi and village industries, cold chains, healthcare, education and IT.

This will facilitate overall rural development, employment generation and poverty alleviation.

10% of the project cost will be provided by REC as soft loan @5%.

Electrification of un-electrified Below Poverty Line (BPL) households will be financed with 100% capital subsidy as per norms of Kutir Jyoti Programme in all rural habitations.

Prior commitment of states will be taken for

deployment of franchisees for the management of rural distribution in projects financed under the scheme, and

the provision of requisite revenue subsidies to the State Utilities as required under the Electricity Act, 2003.

Rural Electrification Corporation (REC) is the nodal agency for the scheme.

(c) As reported by Central Electricity Authority (CEA), expenditure incurred on on-going Hydro-electric projects up to March, 2005 is enclosed as Statement.

Statement

Expenditure incurred on on-going Hydro-Electic Project till 11 March, 2005 Hydro Electric Projects Under Execution in the Country (Excluding Renewables under MNES)
